

Sustainability Commitment Statement

Sakhi Unique Resource Enterprise Pvt. Ltd. (SURE)

Sakhi Unique Resource Enterprise Pvt. Ltd. (SURE) is committed to promoting sustainable development through environmentally responsible practices, socially inclusive programs, and economically resilient value chains. As a social enterprise working closely with rural communities, women entrepreneurs, and grassroots institutions, SURE integrates sustainability principles into its program design, partnerships, and operational practices in alignment with the objectives reflected in the UN Sustainable Procurement Framework.

Environmental Sustainability

SURE actively promotes environmentally responsible solutions that contribute to climate resilience, resource efficiency, and environmental protection. Our initiatives focus on encouraging the adoption of decentralized renewable energy (DRE) technologies, sustainable agriculture practices, and climate-resilient livelihood models. Through our programs, rural communities are supported to adopt solutions such as solar dryers, solar sprayers, hydroponic fodder systems, and biogas plants, which reduce dependency on fossil fuels and improve resource efficiency.

SURE also promotes sustainable agriculture and natural farming practices that reduce chemical inputs, improve soil health, conserve water, and enhance biodiversity. Our work in climate-vulnerable regions supports communities to adapt to climate change while protecting natural ecosystems. These interventions contribute to pollution prevention, efficient use of natural resources, and mitigation of climate risks at the grassroots level.

Social Sustainability

SURE places strong emphasis on social inclusion, human dignity, and equitable opportunities. Our core mission is to strengthen women's leadership and economic empowerment, particularly among rural women from low-income communities. Through capacity-building programs, enterprise development initiatives, and leadership training, SURE has supported thousands of women to become entrepreneurs, community leaders, and agents of change.

Our programs promote gender equality, decent work opportunities, and inclusive participation in economic activities. By supporting women-led enterprises and community-based organizations, we ensure that economic growth is inclusive and benefits marginalized communities. SURE also promotes social well-being and responsible consumption practices, encouraging sustainable production and consumption models within rural economies.

Economic Sustainability

SURE contributes to sustainable economic development by strengthening local value chains, supporting small and medium enterprises, and enabling community-driven economic growth. Our programs facilitate access to markets, technology, and finance for rural entrepreneurs, particularly women-led enterprises.

We encourage life-cycle thinking and sustainable procurement practices by promoting technologies and products that are energy-efficient, resource-efficient, and economically viable over the long term. SURE also works with local entrepreneurs, farmer producer companies (FPCs), and grassroots enterprises to build resilient supply chains that generate local employment and income opportunities.

Through these initiatives, SURE supports the development of sustainable local economies while ensuring that environmental and social considerations remain integral to economic growth.

Commitment to Continuous Improvement

SURE remains committed to continuously strengthening its sustainability practices and aligning its programs with global sustainability frameworks, including the United Nations Sustainable Development Goals (SDGs). Our ongoing work demonstrates tangible progress in advancing clean energy adoption, women-led entrepreneurship, climate-resilient agriculture, and inclusive rural development.

Through partnerships with development organizations, CSR partners, and community institutions, SURE continues to scale sustainable solutions that contribute to environmental protection, social equity, and long-term economic resilience.
